Security Warnings

- Only calls/text messages which are communicated with GOLD LOCK are secure, normal calls/text messages on the device are not secure.
- Do not allow access to the secure phone device by other people.
- Do not allow installation of non-trusted software on the secure phone.
- For maximum security - it is recommended to switch off infra red and Bluetooth connections on the secure phone

Installation

1. You should have sent your [UUID](#) to Gold Lock and received a ZIP file from Gold Lock.
2. Extract the contents of the ZIP file to a folder on your PC.
3. Install by dragging [download.action.mobileprovision](#) and [GoldLock.app](#) (1 file, 1 folder, together) into iTunes.
4. Sync with iPhone.

Configuration

- From the phone's applications menu, click on Gold Lock Enterprise.
- After application is started, select Menu => Settings
- To enable Gold Lock to automatically load when the phone is started, select: **Auto Start Gold Lock = Yes.**

- In the “Settings” screen, the following parameters are available:
 - **Server:** you can set the server address which manages VOIP traffic (default - Gold Lock Secure Server).
 - **Auto-start Gold Lock-** If set to “Yes”, Gold Lock automatically loads when the phone is turned on.
 - **Auto Connect-** If set to “Yes”, Gold Lock automatically connects on startup.
 - **Ringtone** - Enables to switch between the default ring tone, and any other ring tone you select.
 - **Language** - Enables to change the application language.

- When Gold Lock is first activated, you will need to input the following details:
 - **Login details** - the email and password of your Gold Lock account (if you do not yet have those, please sign up at www.gold-lock.com)
 - **Select a name for your secure device.** This will be used by you and your secure contacts to identify your device.

Usage

4.1 Quick Load

To quickly load the Gold Lock secure interface, press the "c" button for 1 second (only available if Gold Lock was previously loaded manually or by selecting "Auto Start Gold Lock")

4.2 Add Secure Contact

Select Menu => Add Contact

Insert the device name of your secure contact and confirm.

4.3 Secure Voice call

At least one secure contact needs to be in your contact list. Blue colored locks are devices that are online.

To initiate a secure voice call, highlight a secure contact, then press the "Dial" green button or select Menu => Call (contact has to be online)

4.4 Secure Text

To send a secure text message, highlight a secure contact, then select Menu => Text (contact has to be online)
Inset text, then press the left button "Send".

4.6 Multiple Tabs

Each secure conversation, text or file transfer is displayed in a separate tab, you can freely switch between tabs during calls

4.7 Manage Secure Contacts

Sign in to your account at www.gold-lock.com to manage everything related to your device and secure contacts.
